ulkin

PRODUCT BROCHURE

Healthy, firm skin **begins with ULKIN**

ULTRA SKIN

DUAL FREQUENCY TECHNOLOGY

01	02	03
14 in 1 Treatment sono	Dual Micro Massaging	Nano-phoresis mode

MEDICON

From Face **to Body**

ULKIN delivers multi **high-density ultrasound energy** matched to each skin layer, **activating cells** with wavelengths smaller than the thickness of the cell membrane — enabling care from Face to **Body**.

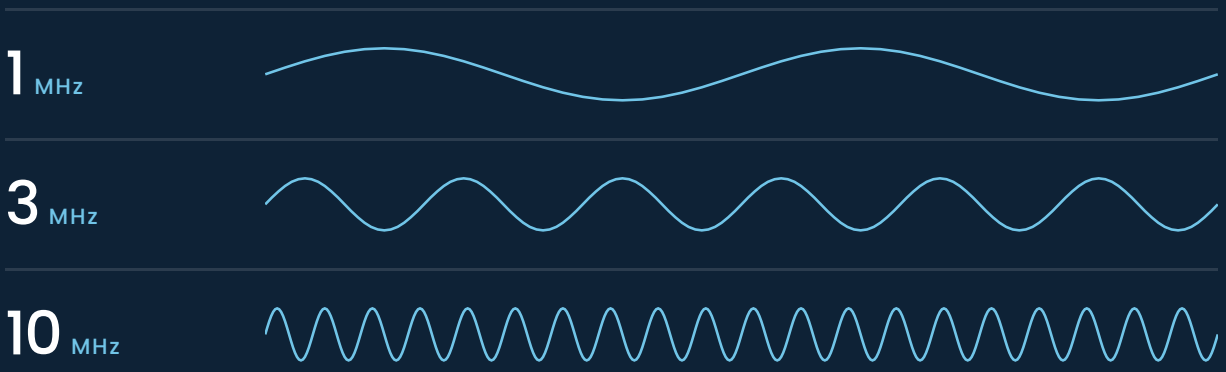

14 Skin Concern Care Modes

14 CARE MODES

01	Regeneration	02	Elasticity
03	Wrinkles	04	Whitening
05	Acne	06	Scars
07	Lifting	08	Moisturizing
09	Stretch marks	10	Atopy
11	Eczema	12	Bruises
13	Facial flushing	14	Slimming

How ULKIN **Works**

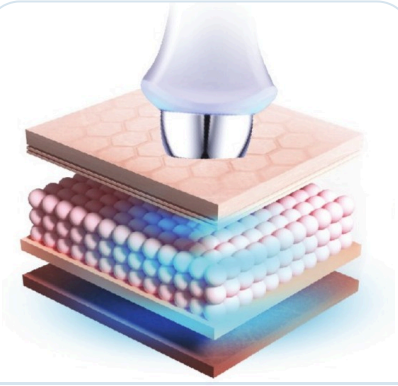

ULKIN is a skin care device that uses alternating-wavelength ultrasound at **1MHz, 3MHz and 10MHz** to deliver high-density vibration energy into the skin **without pain** or **side effects**, stimulating the cells' own activating factors and increasing **collagen and skin hydration**.

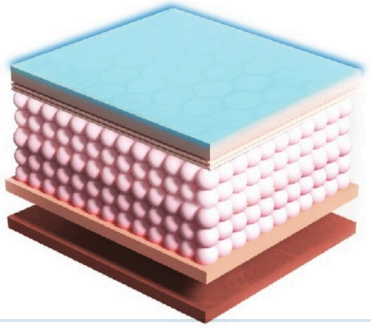

STEP 01

Skin troubles and natural aging cause cells to age.

STEP 02

ULKIN delivers high-density vibration energy 10 million times per second, with wavelengths smaller than the thickness of the cell membrane.

STEP 03

Cellular activating factors are stimulated, forming a moisture-glow protective barrier.

- Frequency, intensity and mode can be selected according to skin condition.

ULKIN **Key Features**

01

Controls the **root causes** of aging-related problem skin

02

Cell recovery and activation for **collagen regeneration**

03

Long-lasting **skin cell vitality** and health

ULKIN

04

Non-invasive treatment naturally promotes cell activity

05

Improves **tone, texture, hydration and skin conditions** in one treatment

06

1MHz / 10MHz single mode boosts absorption of actives

↑ **GAGs**

↑ **HSPs**

↓ **MMPs**

BEFORE & AFTER

ULKIN **Clinical Cases**

CASE 01

Woman in her 40s, before & after

Whitening / wrinkle / elasticity improvement

CASE 02

Man in his 50s, before & after

Redness / swelling improvement

CASE 03

Woman in her 30s, before & after

Stretch mark / scar improvement

CASE 04

Man in his 30s, before & after

Acne improvement

- By increasing collagen and skin hydration, a variety of skin conditions are improved.

COMBINATION CARE

Treatment & care **optimized for skin**

ulkin + HIFU + RF + Laser + Skin Booster + Post-op Care

Through a variety of programs, ULKIN supports **regenerative care**, **reduced swelling and skin recovery** after other procedures, helping to **maximize treatment results**.

Handpiece SPECIFICATION

FACE SONO
3/10MHz

FACE SONO
1/3MHz

BODY SONO
1/3MHz

HIFU
2.0 / 3.0 / 4.5 / 6.0mm

SPECIFICATION

Product

Rated Input Voltage

AC 100V~240V.50/60Hz

Max. Input Current

10A

Power Consumption

40W

Interface

10.1inch TFT LCD (1,024 X 600px)

Dimensions of Main body

281 X 280 X 215mm (monitor open)
(W x D x H)

Weight of Main body

4.7Kg (with handpieces, without cart)
